INFO.

- Since March the railroad line between Prenzlau and Zehdenick, which had been dismantled, has been under reconstruction. To date a single track line has been completed between templin and Vogelsang, 10 kilometers. Forty freight cars with ties are standing in Templin.
- 2.. The railroad bridge over Schulzen creek (18/807 105), which was designed for single-track traffic, has been reinforced by placing a corcrete piling under the two horizontal T beams on both sides across the entire width of the bridge (length of bridge is 6 meters).
- з. The railroad bridge at Newhof on the Havel Canal (N 7/55034) is under construction. According to workers this bridge was to be ready for use on 15 July. Three shifts were working. Two day shifts worked on the bridge while or night shift performed auxiliary functions (see sketch).
- In Milmersdorf, on the Eberswalde-Templin line, a siding with a switching section is being built with the utmost speed. This line is to be finished before the end of July.
